

Overview

Lawrence General Hospital's Regional Center for Rehabilitation Services provides multidisciplinary, comprehensive neurological rehabilitation by skilled physical therapists, occupational therapists, and speech-language pathologists for adults with a range of neurological disorders, including, but not limited to:

CVA and TBI	Amyotrophic lateral sclerosis
Multiple sclerosis	Parkinson's disease
Cerebral palsy	Balance disorders
Muscular dystrophy	Concussion

Therapy helps patients move toward a more independent lifestyle – whether it be assistance with daily activities or returning to work. Education is provided to patients and family members in order for skills to be carried over in the home environment.

Physical Therapy	Occupational Therapy	Speech-Language Pathology
